The year 2025 represents a significant milestone in the history of the seminar and is an opportunity to evaluate the achievements and challenges we have overcome together. It is also a look into the future, which requires new approaches, innovations and joint efforts, which are an integral part of modern road construction in changing conditions – from research and technical development, to sustainable solutions in planning and construction. We invite you to actively participate in this exceptional event, which is an opportunity not only to take stock, but also to create new contacts, discuss the future and find common solutions in this key area of construction.

We look forward to inspiring lectures, interesting discussions and rare meetings with experts from different countries. We believe that the seminar will bring not only valuable information, but also inspiration for further steps forward in our joint efforts for safe and high-quality road infrastructure.
